Letter of Purpose

Dear Professor,

I am Aman, an undergraduate student pursuing a B.Tech. in Mechanical Engineering at IIT Delhi. I am writing to express my interest in joining your research group as a summer research intern.

I believe research is one of the best ways to learn because it allows us to move beyond what we study in classrooms and understand how things work through actual problems, experiments, and practical work. I know that I still have a lot to learn, and that is one of the reasons I am interested in this opportunity.

Through my coursework and projects, I have developed an interest in understanding mechanical systems and working on practical engineering problems. I enjoy learning new things, exploring how things work, and improving my understanding by doing things myself. I would like to experience how research is carried out, how problems are approached when the answers are not already known, and how ideas develop into meaningful results.

I do not expect to know everything before beginning. Instead, I hope to bring curiosity, sincerity, and a willingness to put in the effort required to learn. I would be grateful for the opportunity to work under your guidance, contribute to your research, and learn from your experience.

Thank you for your time and consideration. I would be grateful for the opportunity to learn and contribute to your research group during the summer.

Sincerely,
Aman
B.Tech. Mechanical Engineering
